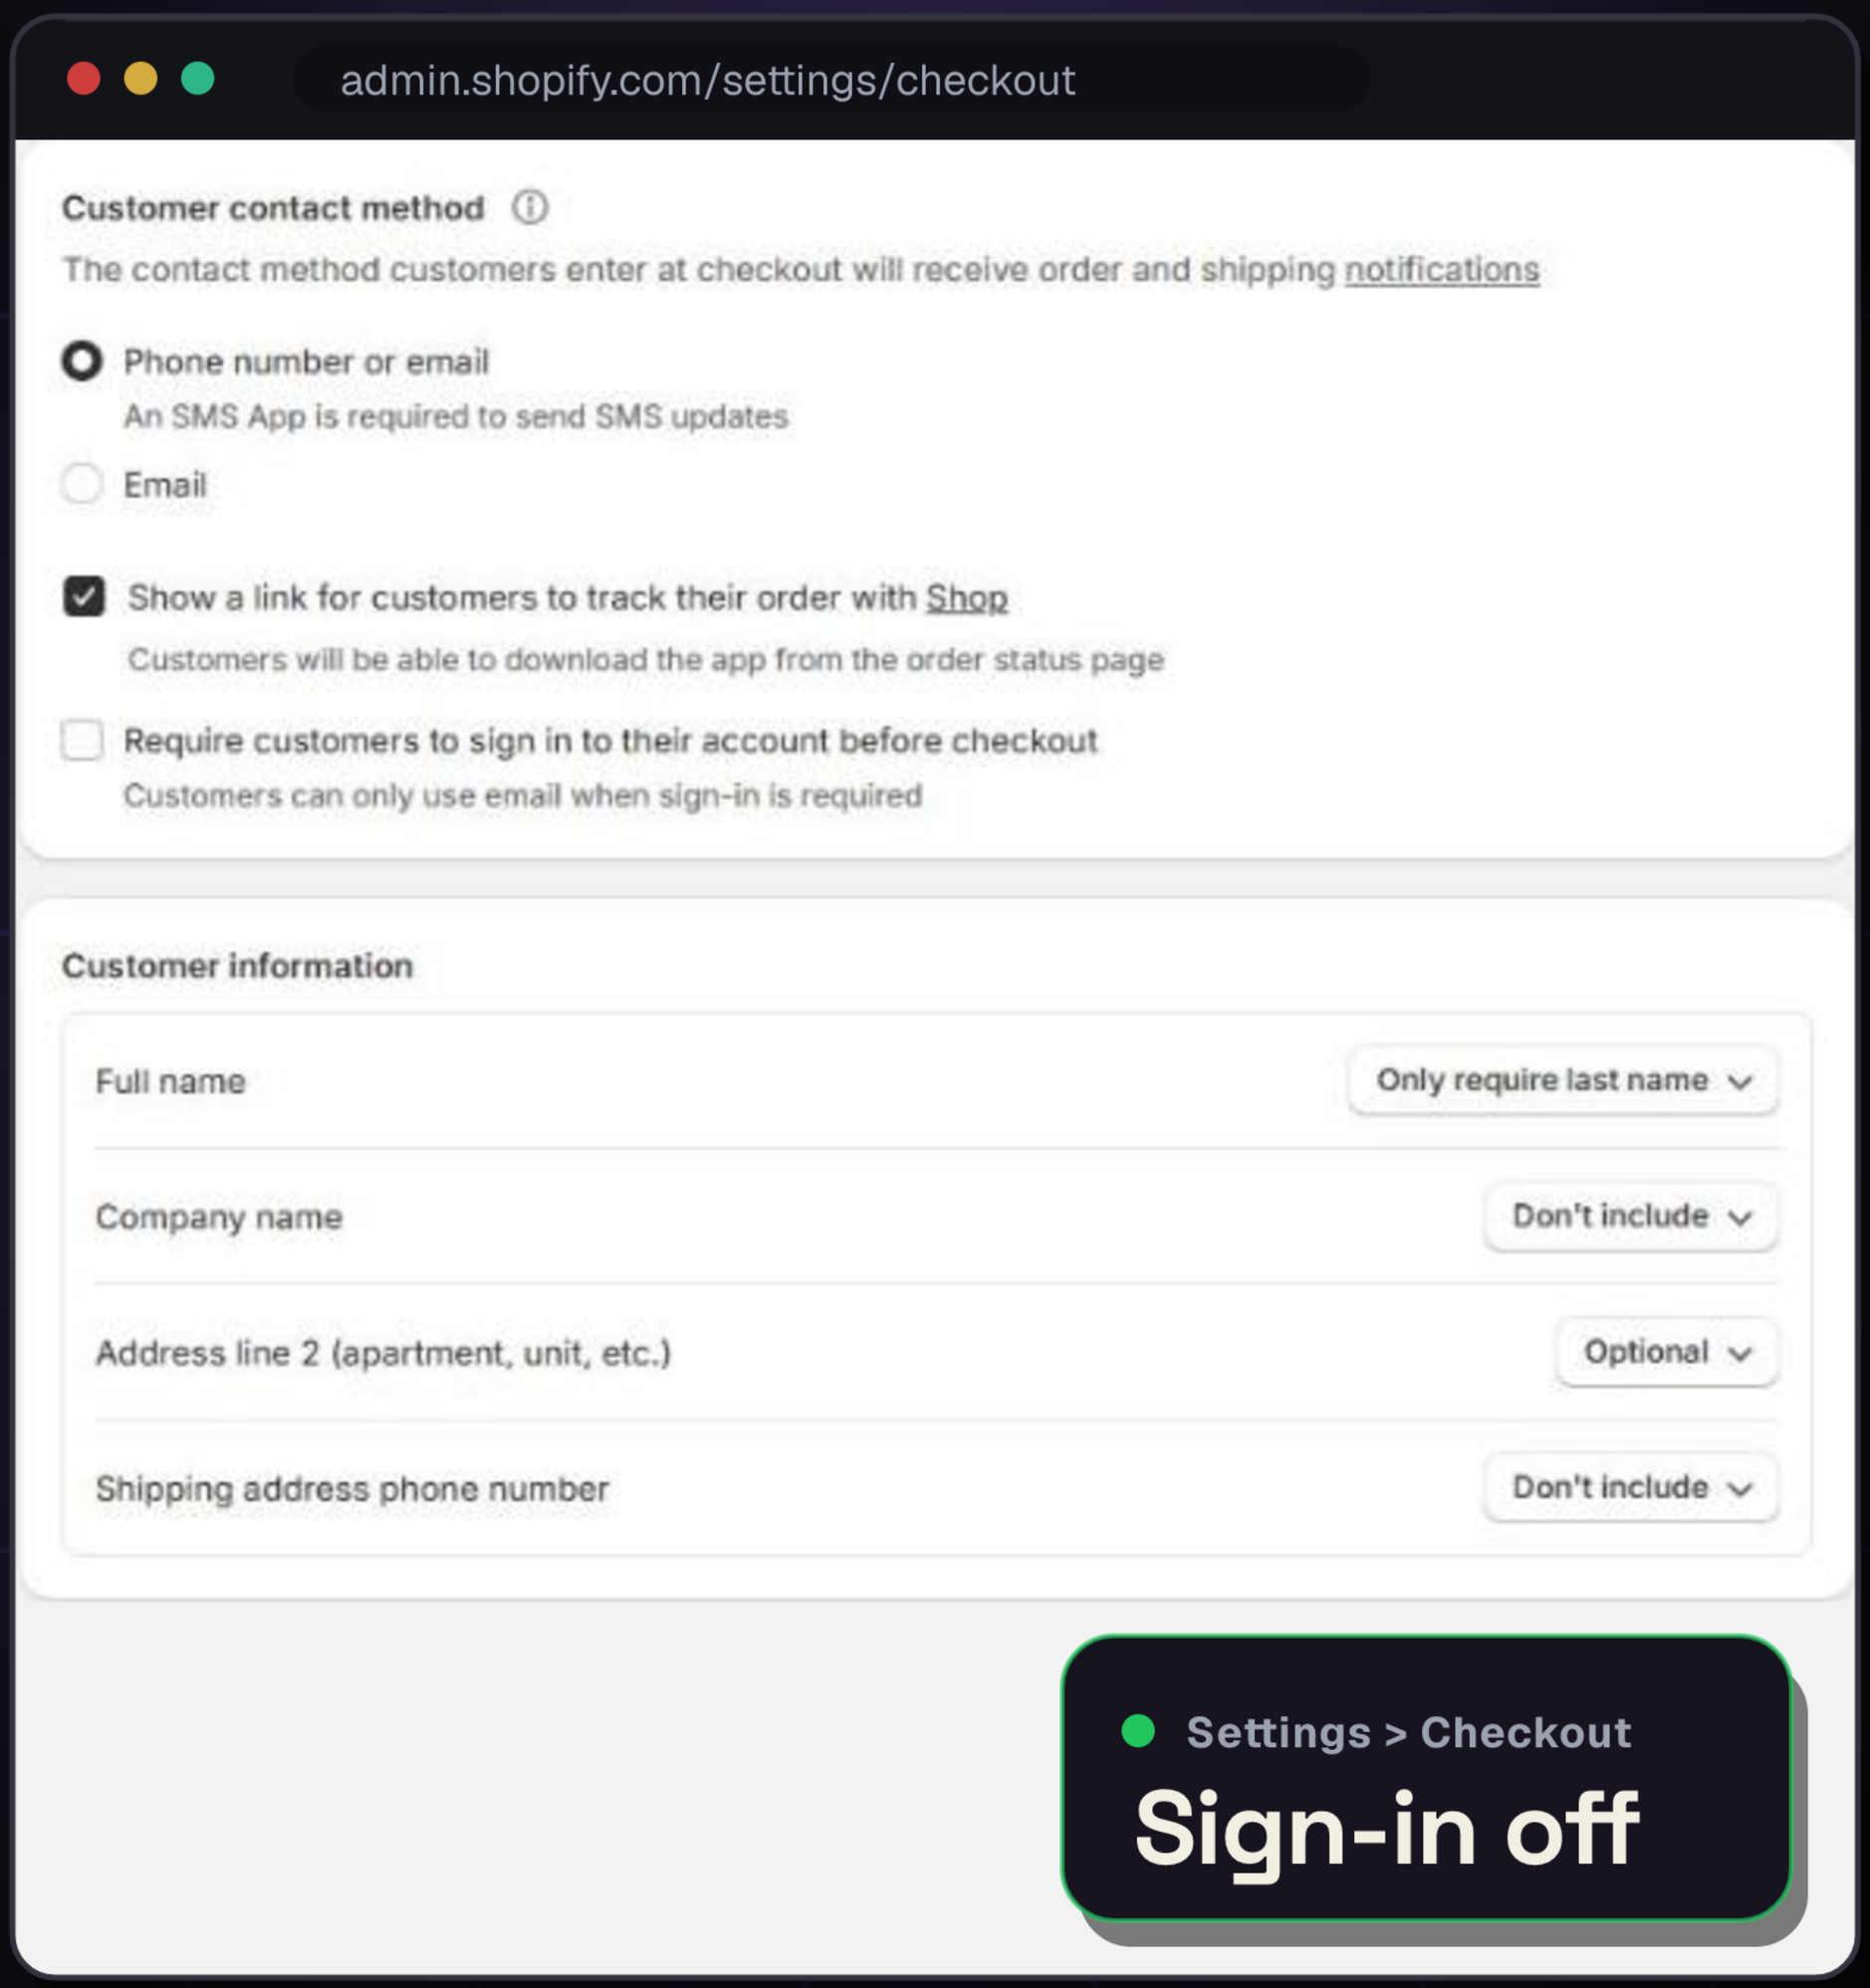
Kaspian Fuad · Shopify CRO

What it does in there

- Explains checkout settings
- Recommends checkout apps
- Searches Help Center live
- Guides Checkout Blocks setup

Swipe →

The settings it covers



These are the checkout settings Sidekick can explain in plain language from inside the editor.

Swipe →

How to open it

1

Settings > Checkout

from your admin

2

Click Customize

opens the editor

3

Sidekick icon

top bar, desktop only

Swipe →

4 things to ask it today

- Ask about company name field
- Ask about guest checkout setting
- Find an app for upsells
- Understand one-page checkout

Swipe →

What it can’t do yet

- Make changes for you
- Read your store data
- Work on mobile admin
- Write Liquid code

Swipe →

My take

Your checkout editor: it’s the place you make changes but always had to leave to find the right setting. That tab-out is gone now. It’s desktop-only and early. Data access and mobile will come. Use it for questions today.
